

Drinking water treatment plant

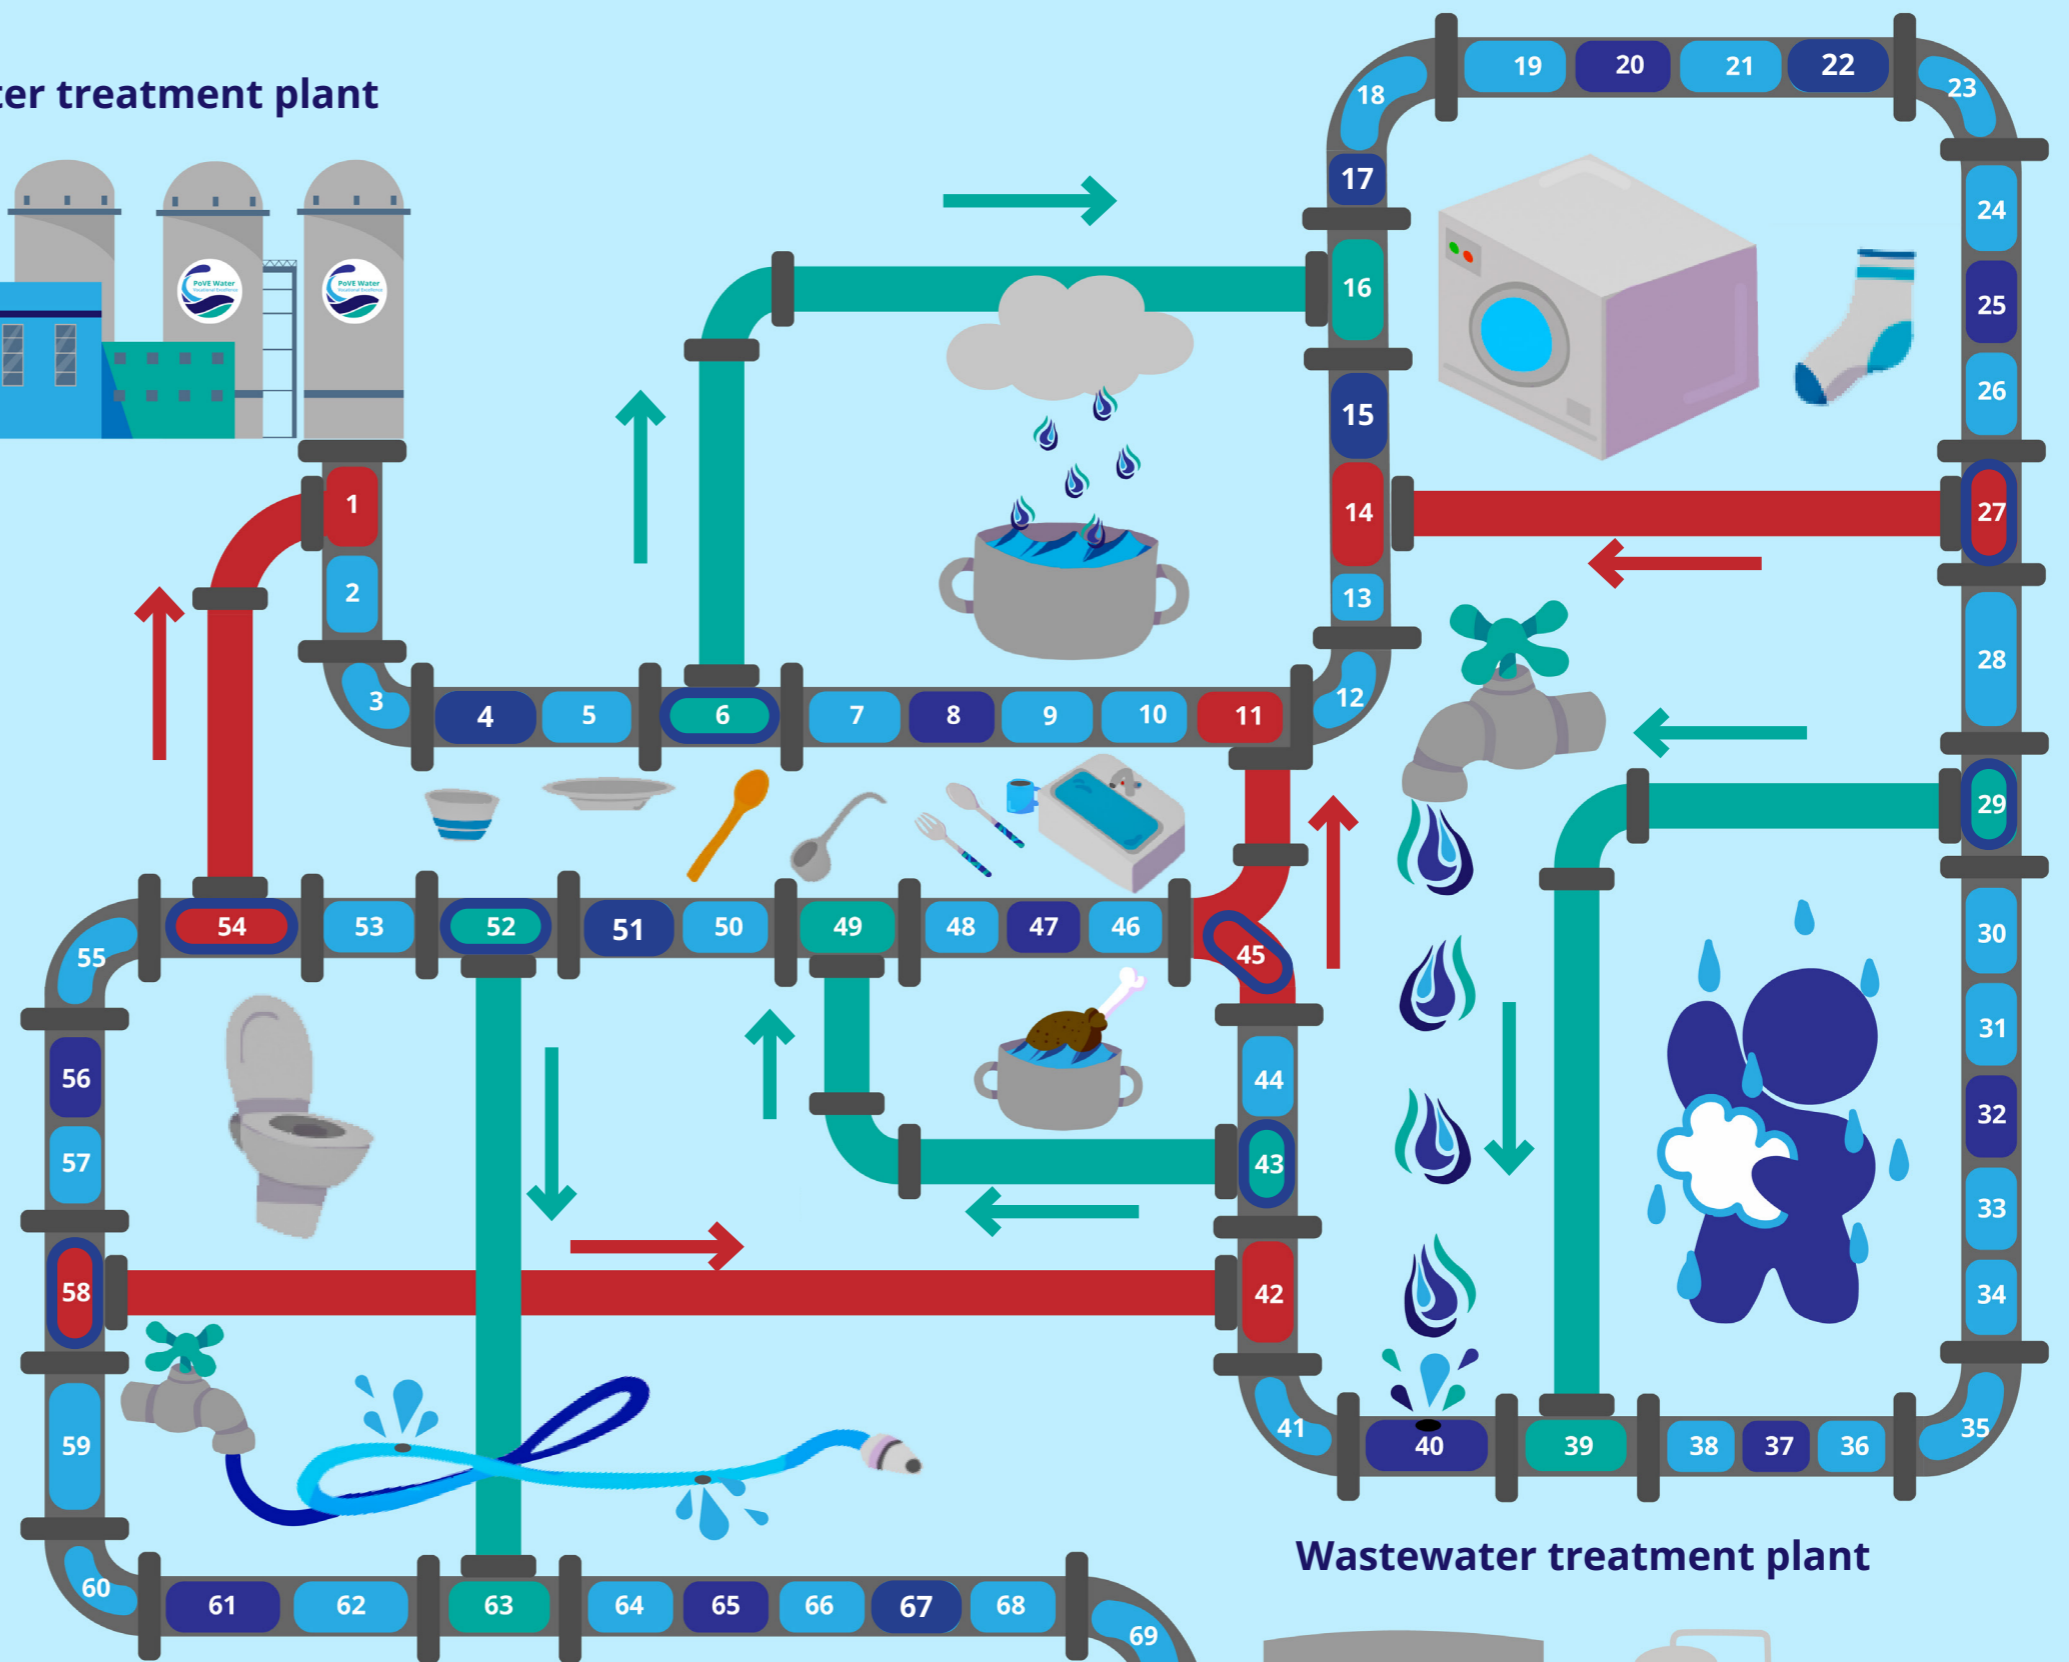

SUSTAINABLE USE OF WATER BOARD GAME

We face a serious water shortage, and the cost of clean drinking water keeps rising.

Try out this environmental board game! Race to the finish by managing your water usage. Roll the dice, move along the board, and watch out for obstacles.

The first player to reach the finish line wins. Highest dice roll starts the game.

-  Have a friend ask you a question. If you answer correctly, roll the dice again. If not, stay on the same tile.
-  Get a friend to ask you a question. If you get it right, move forward in the water pipe. If not, stay where you are.
-  Have a friend ask you a question. If you answer correctly, you stay put. If not, move back in the water pipe.

-  **6** You collect rainwater! Go to tile 16.
-  **27** You put the washing machine with only a few clothes.
-  **29** You turned off the water while soaping. Go to tile 39.
-  **43** You unfroze meat in a bowl with water. Go to tile 49.
-  **45** Go back to tile 11. You left the faucet dripping.
-  **52** You have a dual-system toilet bowl. Go to tile 63.
-  **54** Go back to tile 1. You washed dishes under running water and wasted water.
-  **58** Go back to tile 42. Your watering can is leaking.
